INTRODUCTION

From 2009 to 2011 a German-French research program, funded by the German Research Foundation (DFG) and the Agence Nationale de la Recherche (ANR) has made possible a series of projects in the enlarged frame of the "early" Nabataean settlement at Petra and in its surroundings.

The conference aims at bringing together people directly involved in the above mentioned research program with colleagues from abroad working on similar topics for a scientific exchange. Contributions shall deal directly and indirectly with the earliest traces of Nabataean presence in the Petra area, all over fields of research and across different genres (landscape archaeology, material culture, structures, texts etc.). Positive as well as negative results shall be presented and discussed, questions related to continuity and discontinuity, methodical and practical problems and others more

PROGRAM

The provisional time schedule is based on a 50 min unit for each paper (including 40 min for the paper and 10 min individual discussion) followed by a discussion of each session lead by the chair.
